EDII signs MoU for tech-based entrepreneurship with Survey of India

Ahmedabad: The Entrepreneurship Development Institute of India (EDII) on Thursday entered into a memorandum of understanding (MoU) with the Survey of India to develop technology-based

entrepreneurship. The event coincided with National Startup Day, as the collaboration will strengthen ventures in areas such as geospatial technology, etc. "Most entrepreneurs are conscious about adopting new

technologies, without waiting for the existing ones to become obsolete. Technologies also escalate an organisation's power to compete," said Dr Sunil Shukla, director general of EDII. TNN
